

CETECOM offers market approval for EETS devices.

Summary: CETECOM offers test services for EETS devices and also the approval for these devices through its own Notified Body EETS. CETECOM is your partner for the market approval of EETS devices. Testing and certification, everything from one source.

June 13, 2017 / Essen, Germany – The European Electronic Toll Service (EETS) allows the payment of tolls with a single contract using an EETS provider (the so-called EETS Provider) and only one On-Board Unit (OBU) throughout the European Union.

Goal: To simplify the payment of tolls within the EU.

Directive 2004/52/EC on the interoperability of electronic road toll systems in the European Union and decision 2009/750/EC on the definition of the characteristics of the European Electronic Toll System and its technical components constitute the conditions for the introduction of EETS in the EETS areas of its member states.

CETECOM offers test services for EETS devices and also the approval of these devices through its own Notified Body EETS. CETECOM is your partner for the market approval of EETS devices. Testing and certification, everything from one source.

More information about EETS and CETECOM's test and certification services can be found [here](#).

About CETECOM

For over twenty years, CETECOM has been renowned as an independent provider for test and certification services. With test labs in Europe, North America and Asia, CETECOM provides consulting, testing and certification for wireless technologies such as Cellular, Bluetooth, Wi-Fi, RFID, NFC, WPT and Radar. We furthermore perform a wide range of testing in the areas of EMC, Radio, OTA, SAR, field trials, electrical safety and acoustics.
