**Release date** : **immediate**

### Latching Vandalproof Switch in Stainless Steel

The MPL Series of vandalproof switches extends the existing range of metal housing switches from Engelking for extreme environments.

Incorporating a mechanical actuation, the switches are available in a variety of styles and sizes from 21-28mm with front or rear of panel mounting options.

Made of turned high quality stainless steel, the switches can be used in situations requiring robustness and resistance to vandalism.

The use of a clip-in microswitch means that harnesses can be pre-wired separately from mechanical assembly, saving time and costs while improving quality.
