## **Ximen Starts Final Excavation for Kenville 257 Portal Installation, Moving Closer Towards Production**

**Vancouver, B.C., August 14, 2020 – Ximen Mining Corp.** (TSX.v: XIM) (FRA: 1XMA) (OTCQB: XXMMF) (the “Company” or “Ximen” - <https://www.commodity-tv.com/ondemand/companies/profil/ximen-mining-corp/>) is pleased to provide the following update on progress at the Kenville Gold Mine project in the Nelson mining camp in southern British Columbia.

Work on the 257 portal continued with placement of screening above the portal site followed by the start of overburden excavation for placement of the steel culvert. Once the excavation is complete, the bed for the steel culvert will be prepared. Preparation of the rock face and installation of steel and timber sets will be done prior to placement of the portal culvert. After the culvert is installed, the overburden will be backfilled around the portal culvert. After that has been completed the mine services (air and water lines) can be installed and connected to the underground workings. This will facilitate access to the mineralized areas outlined in the 2009 historic resource estimate (as described in a previous news release dated April 8, 2019).
