

Press release MPDV

Between data integrity and regulation Industry solution for Life Science

Mosbach, April 08th, 2019 – With the new HYDRA solution for Life Science, MPDV helps regulated manufacturing companies to produce more efficiently while complying with all regulatory requirements.

HYDRA for Life Science is based on MPDV's Manufacturing Execution System (MES) HYDRA, which is used worldwide and across all industries. It offers many functions and applications that a regulated manufacturing company requires. This includes software support for the CAPA process (Corrective And Preventive Actions) and for training management for employees working close to production. HYDRA for Life Science also supports the risk management with an FMEA module integrated into our global CAQ solution. The electronic Device History Record (eDHR) ensures a GMP-compliant manufacturing documentation.

HYDRA for Life Science can be regarded as standard software, which facilitates the typical procedure for verification as a GxP computer-aided system. It is also beneficial that MPDV operates a quality management system (QMS) which is certified according to DIN EN ISO 9001:2015.

The new industry solution will be officially presented at the T4M, the new trade fair for medical technology in Stuttgart, at the beginning of May 2019.

WE CREATE SMART FACTORIES

About MPDV

MPDV, headquartered in Mosbach, is the market leader for IT solutions in the manufacturing sector. With more than 40 years of project experience in the manufacturing environment, MPDV has extensive expertise and supports companies of all sizes on their way to the Smart Factory. Products such as MPDV's Manufacturing Execution System (MES) HYDRA or the Manufacturing Integration Platform (MIP) enable manufacturing companies to streamline their production processes and stay one step ahead of the competition. The systems can be used to collect and evaluate production-related data along the entire value chain in real time. If the production process is delayed, employees detect it immediately and can initiate targeted measures. More than 800,000 people in over 1,250 manufacturing companies worldwide use MPDV's innovative software solutions every day. This includes well-known companies from all sectors. MPDV employs around 420 people at eleven locations in Germany, China, Malaysia, Singapore, Switzerland, and the USA. Further information: www.mpdv.com.
