## **Romanian RCS's Sports Channel Digi Sport TV selects Panasonic**

*Channel's investment plan to improve workflow and image recording flexibility*

Bucharest, 11th September 2009 – Digi Sport, the newest TV platform of RCS & RDS in Romania for live and exclusive transmissions of the most popular national and international sports competitions, has purchased video cameras and other technical equipment from Panasonic.

The technology includes the portal professional video camera HD P2 AG-HPX301E, P2 AJ-PCD35E readers and P2 AJ-P2E032XG memory cards— part of the newest E-Series. P2 Panasonic video cameras will be used by Digi Sport for sport competition broadcastings from the Romanian League 1, as well as the Primera Division, Bundesliga, Premier League, Italia A Series, Moto GP, NBA, handball and gymnastics.

The decision by Digi Sport to choose Panasonic equipment was mainly based on the increasing requests for flexibility and quicker work-flow, as well as for the video quality and the facility to use the recordings. „By adopting P2 Panasonic technology we have the advantages of a very high quality image, reliability, maximum flexibility and a quick work-flow in processing the recordings which can effectively respond to Digi Sport's technical and quality standards.” said Emil Grecu, CTO at RCS & RDS.

The addition of Panasonic equipment for Digi Sport is part of a wider investment program at RCS & RDS - an important telecommunications operator from Eastern Europe, with concentrated activity in Romania where it has become the leader in the cable and satellite television market.

The investment programme at RCS & RDS endorses the assurance of the superior equipment and technology for qualitative broadcastings. These are necessary for transforming a freshly launched television channel into a quality and hugely dynamic one.

"For Panasonic, Digi Sport's strategic decision to adopt the P2 format is not only viewed as an important contract but it also, represents an important commitment. We believe that the satisfaction, quality and reliability offered through the P2 format will, in the future, influence other Romanian television channels to adopt the same format." - Eduard Tronaru, Panasonic Romania Sales Representative added.

*Ends*

#### **About Panasonic**

The Panasonic Corporation is a world leader in the development and manufacture of electronic products for a broad range of consumer, commercial and industrial applications. The company, based in Osaka, Japan, reported net consolidated earnings of 7 770 billion Japanese yen (roughly 78.4 billion American dollars) for the financial year ending 31 March 2009. The company is listed on the Osaka, Nagoya and New York (NYSE: PC) stock exchanges. More information on Panasonic, the company and brand, can be found at the website <http://panasonic.net>

#### **About PBITS**

Panasonic's Professional & Broadcast IT Systems Business Unit is part of Panasonic Audio Visual and Computer Systems Europe (PAVCSE), a division of Panasonic Marketing Europe GmbH. The company is a leader in the development of video formats and core products for broadcast and professional AV, including camera-recorders, video recorders, monitors and mixers. Panasonic's P2HD systems provide the reliability of solid-state production with immediate connectivity to existing IT infrastructures, allowing for completely IT workflows. [www.panasonic-broadcast.com](http://www.panasonic-broadcast.com)

#### **About P2 HD products**

P2 HD solid-state products offer the possibility of high-definition recording without mechanical wear and environment-related limitations as are typical for tape, hard disk and optical disk-based systems. P2 HD guarantees extreme reliability, especially in demanding conditions of extreme temperature ranges, impacts and vibration. P2 HD products bring significantly lower maintenance costs, longer operating life, and instant access to video recordings (without the need for digitisation, filing to memory with descriptors for later search or any need to create proxy video files) and to metadata. P2 HD offers the reliability of production based on solid-state technology, instant possibility for connection with existing IT infrastructure, as well as speed, ease of use and portability of P2 cards, as well as compatibility with top-end non-linear editing systems.

#### **About Digi Sport**
