

JAKOB meets the highest requirements in quality management

Received certificate according to DIN EN ISO 9001: 2015

The internationally recognized standard for quality management is DIN EN ISO 9001. It specifies minimum requirements for a company's QM and forms the basis for a continuous improvement process. Since the end of 2015 the latest revision has been published, DIN EN ISO 9001: 2015.

This quality feature is also characterized by JAKOB Antriebstechnik from Kleinwallstadt, which received the latest revision of this certificate. In this way, the quality management that has already been highly valued by the customer is not only applied but also steadily improved.

JAKOB Antriebstechnik GmbH has been innovative in the field of drive technology for more than 45 years. Among other things, it produces servo couplings, clamping technology and the motor spindle protection system MS³.
