**CeBIT 2006: EMPRISE Process Management
Presents Service Packages for Bonapart**

**InterSystems Implementation Partner Offers Comprehensive
Consulting Services Complementing its BPM Software**

Hanover, March 09, 2006 – At CeBIT 2006 (hall 3, booth C20), EMPRISE Process Management (before Pikos) presents new service packages for its BPM tool Bonapart. Each of the new service packages offers tailored consulting services regarding a key challenge like ITIL, identity management, and process integration. Since July 2005 the company is part of the EMPRISE group. This has greatly enhanced the consulting competencies, and enabled them to offer more comprehensive consulting services in the area of business process management and IT.

The Bonapart Services Packages comprises several all-in-one packages for the clients of EMPRISE. In addition to the proven BPM solution Bonapart, comprehensive business process management service offerings relating to ITIL, K-Fall, identity management, process-based ERP deployment, performance management, document-oriented process management, and process integration are covered. These service packages may be tailored exactly to the environment and the dedicated utilization of Bonapart at the client site.

Bonapart helps companies of any size and in any industries to structure, analyze and simulate business processes, systems and organizational structures in an efficient way, and in addition to monitor execution in real-time. When introducing Bonapart in an enterprise, EMPRISE consultants support the complete project life cycle from planning to implementation, and customization according to the individual requirements.

At CeBIT, EMPRISE presents in cooperation with InterSystems examples of efficient business process management using solutions of the Bonapart suite. Thus the Bonapart BPEL Modeler supports the rapid and easy-to-use modeling of business processes in the Business Process Execution Language
