Stuttgart, 8th March 2007

The LSMW GmbH is distinguished by many years of project experience. The LSMW GmbH currently employs 344 staff members and has branches in Switzerland, Austria, Poland and The Netherlands. Existing locations are being upgraded in Germany (Stuttgart (Head Office), Nuremberg, Ludwigshafen, Leverkusen, Frankfurt and Berlin) and new locations are being established (Penzberg, Biberach).

The focus is to be located as close as possible to the client. This philosophy rises events aiming to impart on participants the practical knowledge the LSMW, together with partners and clients, has gained in many years of project experience.

"Pharma today! – Pharma tomorrow?"

The symposium "Pharma today – Pharma tomorrow" deals with the development of the pharmaceutical industry beyond the present. Speakers from the regulatory affairs, operational, design and plant construction as well as from a totally different industry, the automobile industry, offer the participants an overview over the future of the pharmaceutical industry. The interdisciplinary approach reveals other vistas.

This spectrum of topics primarily addresses persons from the pharmaceutical industry, who are active in the following areas:

- Management
- Plant- and Factory Managers
- Production Managers
- Supervisors
- Co-workers of
 - Production,
 - Technical Areas and Quality Control.

"How to realize drug manufacture"

The event "How to realize drug manufacture" is being presented for the second time. In November 2006 the organizers and speakers addressed questions put forward by the numerous participants. Feedback was positive overall. Besides benefiting from the topics presented, the participants also benefited from mutual exchange. The LSMW and DSM Pharmaceutical Products see a great future in the joint cooperation launched in this field.

As in the previous year, highly qualified speakers from Midas Pharma, Sartorius and Dr. Holger Bengs Biotech Consulting will participate in shaping this year's programme.

This seminar is designed for personnel involved in managing the drug development pipeline and product life cycle in emerging pharmaceutical or biotechnology companies.

The program will be especially beneficial to those employed in the following functions:

- General Management
- Drug Development
- Medicinal Chemistry
- Process Development
- Contract Manufacturing
- Production- / Manufacturing Planning
- Project Management
- Intellectual Property
- Quality Assurance
- Regulatory Authorities

The presentations and discussions will bring more clarity to the aspects of in-house production **versus** contract manufacturing by covering essential elements needed to manage timelines, costs, risks and decision processes efficiently.

Company Profile LSMW

The LSMW GmbH is an engineering contractor company which specializes in requirements for the Life Science and chemical industry. Its comprehensive solutions are for Pharmaceutical Industry, Biotechnology, Fine Chemical and Chemical Industry, Medical Device Industry, Food Industry and Cosmetics Industry.

The customers of this M+W Zander subsidiary include both large and medium-sized enterprises as well as start-up enterprises. The service spectrum includes Consulting, Planning, Realization, Qualification / Validation and Technical Facility Management.
