

COMM-TEC Exertis takes over distribution for AiroDoctor® air purifier

COMM-TEC Exertis has taken over distribution for AiroDoctor® air purifiers in Germany, Austria, Switzerland and Eastern Europe

Uhingen, October, 23rd 2020

COMM-TEC Exertis has expanded its portfolio with the antiviral air purifiers from [AiroDoctor®](#). Partners of COMM-TEC Exertis in Germany, Austria and Switzerland as well as Eastern Europe have now access to a modern air purifier which, thanks to an innovative UV-LED photocatalysis filter, removes 99.9% of all viruses, bacteria and odors from the room air without leaving any harmful residues.

The AiroDoctor® air purifier is equipped with a 4-stage filter system, which guarantees a comprehensive and thorough cleaning of the room air. The combination of pre-, carbon-, HEPA- and photocatalytic LED filter removes not only rough particles such as dust, hair and fibers, but also chemicals, gases, odors, pollutants as well as fungi, bacteria and viruses from the air. Due to the fine porous structure of the photocatalyst, there is an excellent filtering possibility of particles with a diameter of less than 0.1 µm. Thus, even infectious aerosols are rendered harmless without any residue thanks to the unique UV-LED catalysis system with filters made of titanium dioxide. This applies, among other things, to 99.9% of all corona viruses, noro- and influenza viruses as well as all harmful and multi-resistant bacteria. The AiroDoctor® works in a particularly environmentally friendly way without any chemicals.

Thanks to its innovative filter system, the air sterilizer makes an important contribution to infection prevention, especially in waiting areas, treatment rooms and other rooms in medical facilities as well as in retirement and nursing homes. In addition, the AiroDoctor® is particularly suitable for use in offices, conference rooms, schools and kindergartens as well as fitness studios. One device can effectively clean the air in rooms of up to 200 square meters.

"The AiroDoctor® is the right product at the right time! Especially in the corona pandemic, the unique photocatalyst clearly distinguishes it from competing products and enables the effective fight against infectious aerosols" says Carsten Steinecker, Managing Director of Business Development, at COMM-TEC Exertis. "COMM-TEC thus offers its customers the ideal solution for healthy indoor air in any application areas and enables in particular a low-risk return to the conference rooms," Steinecker continues.

"We are pleased to engage COMM-TEC, a well-known and well-established partner for the distribution of the AiroDoctor®. The team is characterized by professionalism, ambition and a trustworthy cooperation, which provides us with the perfect foundation to significantly expand

our market share in Germany, Austria and Switzerland", says Carsten Hermann, CEO ScreenSource GmbH.

Customer testimonials

Barbara Elwardt, owner of [ioo Gesellschaft von Architekten mbH](#), Berlin:

"As a team, we thought a lot about sensible hygiene and protection measures for our architectural office at an early stage and found a unique and sustainable solution for air purification in the AiroDoctor®. We can now ensure that infectious aerosols are no longer a danger to our employees. The AiroDoctor® convinced us in comparison to other products, especially with regard to use in autumn and winter, when adequate ventilation will no longer be possible".

Ulrike Götz, Managing Director at [azzurro Fitnes- und Gesundheitsanlagen GmbH](#), Uhingen:

"We have placed the AiroDoctor® in our course room because we want to give our course participants a maximum feeling of security during the exercise hours. Elder customers also feel comfortable with the AiroDoctor® and make regular use of our services again".

Gerhard Oechsle, Managing Director [Reha-Sport- und Fitnesspark GmbH](#), Geislingen:

"As an innovative health center, we are always open to innovations. The AiroDoctor® fits perfectly with our philosophy here and, especially in times of the corona pandemic, gives both our customers and our employees a good feeling in the therapy and training areas. After just a few days, we received feedback from our customers, who reported a significant improvement in the air quality in the affected rooms".

About AiroDoctor®

AiroDoctor® is a trademark of ScreenSource GmbH with headquarters in Raguhn-Jessnitz, Germany. The international team with offices in Germany and South Korea consists of biochemists and product designers with a background in research, development and production of innovative liquid crystal and OLED display technologies. With the technological lead, the team has been able to achieve groundbreaking results in the field of UV-A LED photocatalysis. The complete disinfection of air and elimination of infectious aerosols represents a milestone in

this technology. The close cooperation with the South Korean state institute KICT is a major driver in this field. Today, ScreenSource GmbH's range of solutions extends from innovative display products to professional air purification solutions such as the AiroDoctor®, which incorporates the technology officially recommended by the South Korean government in the fight to reduce the risk of SARS-CoV-2 (coronavirus) infections since 2020.

About COMM-TEC Exertis

For more than 30 years, COMM-TEC Exertis has been one of the largest and most renowned value-add distributors for AV media technology in Europe and has been part of DCC Technology Trading/Exertis since 2019. The company headquarters is located in Uhingen near Stuttgart and distributes the products of more than 60 well-known manufacturers. The business units "Digital Signage & Media Solutions", "Collaboration & UCC", "Signal Management", "Pro Audio & Control", "Display Solutions" as well as "Racks & Mounts" provide master technicians, system integrators and architects with the optimal hardware for their requirements. COMM-TEC acts strongly according to its claim "Think Solutions": it creates a consciousness for thinking and acting in terms of solutions, and for offering solutions. COMM-TEC supplies everything from one source, from planning through consultation to implementation.
