FOR IMMEDIATE PUBLICATION

Canvys' VA Series Displays Now Available in a Wide Format

Canvys – Consultation, design, development and implementation of comprehensive visual technology solutions for health care, Original Equipment Manufacturers (OEMs) and digital signage applications

Donaueschingen – 2009-09-29. Donaueschingen. Canvys – Visual Technology Solutions is expanding its VA series by adding wide format 20" and 22" devices. The design includes a narrow and symmetrical housing frame, combined with a durable stand.

Canvys, a global value-added integrator and manufacturer, specializes in creating comprehensive solutions by offering standard and custom displays. Our flexible and diverse product portfolio can be customized for all customer requirements.

Other details

The 20" and 22" wide displays have a resolution of 1680 x 1050 in the 16:10 format. As with all the displays in the VA series, these two models have an analogue interface, and a digital DVI-D input. Users can combine the VGA connector with composite and S video functions. For applications in the monitoring area, the LCD screens can be delivered with digital DVI-I input and composite video in/out (BNC), to enable a signal connection. Color options include black, silver-black or acer-white.

All displays in the VA series are equipped with a special stand that contains the cables. The wide displays also have a VESA 100 adapter as a standard feature, and other sizes (12.1" to 19") are attached with the VESA 75 adapter. The VA series fulfills precise customer specifications with its uniform design and wide range of display sizes. In addition, standard features on the VA Series include an external power supply and a speaker on the rear side.

Press Release

A Division of Richardson Electronics

Canvys offers the option of equipping the TFT displays with safety glass, allowing for the displays to be used in high-traffic areas and/or extreme environments. The 2.5-millimeter thick, nonreflecting safety glass protects the sensitive module against improper treatment and external environmental influences such as moisture and dust.

Canvys is an expert at touch screen and protective shield integration of branded and non-branded LCD displays. In addition, as display experts, we offer products in metal housing. These products are combined in the VM series and are available immediately. **For more information, please see contact below.**

Contact the Donausingen solutions provider for additional information on configuration possibilities.

The devices are currently available from Canvys.

Technical details and prices can be obtained upon request.
