

Wiha presents the LiftUp 26one® magazine bit holder – 26 screwdrivers in one hand tool. Saves time, space, and weight

One tool for all applications – 26one® magazine bit holder by Wiha

Schonach, April 2016 – When choosing the best hand tool for everyday work, craftsmen look for tools which are as light as possible and which take up as little space as possible in their toolboxes, cases, and belts, while still featuring excellent functionality and ergonomic and time-saving properties. When developing new products, Wiha focusses closely on user requirements and is now launching its latest innovation, the LiftUp 26one® magazine bit holder, an indispensable assistant for every day. With thirteen double bits, it offers 26 of the most common drive profiles in one single tool. It saves space and weight, as well as time, since it is possible to select, remove, and return bits at the mere touch of a button.

Its design is based on its predecessors from the Wiha LiftUp family from 2014, with a magazine inside the handle that opens at the press of a button. As the name suggests, the 26one® offers the user thirteen unique double bits – encompassing twenty-six of the most common drive profiles in a compartment design that guarantees easy access. Users therefore have a wide range of bits in a single hand tool, which conserves space in the toolbox as it also lightens up the belt since it only weighs approximately 200 g. At the same time, the Wiha SoftFinish multi-component handle with roll-off protection ensures healthy, comfortable use. In addition to elements to boost efficiency and satisfy user requirements, these design features to benefit ergonomics were at the forefront during development.

The “LiftUp 26one®” magazine bit holder offers an entire bit assortment inside the handle and conveniently presents bits to the user at the touch of a button.

About Wiha

Wiha is one of the leading manufacturers in the world for hand tools for professional use in trade and industry. A host of awards are evidence that it sets standards in terms of functionality, design and quality. In 2015, Wiha was the first hand tool manufacturer in the world to receive the internationally recognised AGR seal, which confirms the effectiveness and benefits of its screwdriver and plier handle ergonomics. Alongside these high ergonomic standards, the innovative range of screwdrivers, torque tools, L-keys, bits, soft-head hammers, pliers, measuring tools and articulated hoses also offers real added-value and user benefits in terms of increased efficiency and functionality in everyday work. Founded in 1939, the company was also distinguished with the Manufacturing Excellence Award (MX Award) as the best SME in Germany in 2014. Currently, over 800 Wiha employees manufacture and market more than 3,500 premium tools. www.wiha.com
