

Infotecs Showcases Cyber Innovation at Infosecurity Europe in London

London/Berlin, June 22, 2017 – At Infosecurity Europe in London, Infotecs, the international Cyber Security and Threat Intelligence provider showcased a number of the innovative approaches to Mobile, Cloud, Internet of Things (IoT), ICS & SCADA security and Threat Intelligence from which its customers are benefiting. In addition to exhibiting, Infotecs presented a Cyber Innovation showcase that highlighted the security challenges and latest trends in the Cyber Threat landscape and what organizations can do to prepare themselves and bolster their cyber defenses.

“In today’s connected, digital world the traditional boundaries of the corporate network are being constantly re-defined while exposure to vulnerabilities and cyber threats has exponentially increased. As a result, the challenge of properly safe-guarding and securing critical information is more complex than ever before. Organizations of all sizes need to consider new thinking and innovative approaches to security to keep pace and prosper in the digital world”, said Infotecs Strategic Consultant Chris Jones.

The Infotecs ViPNet Security and Threat Intelligence Platform gives customers the best solutions to meet these constantly evolving challenges by providing innovative, robust, cost-effective solutions for the toughest cyber security challenges. ViPNet’s military grade, unique point-to-point encryption provides exceptional advantages to Mobile Security and IoT deployments where speed and connectivity at low bandwidths is critical. ViPNet’s unique ability to verify and validate machine-to-machine commands goes beyond traffic protection to provides enhanced ICS and SCADA security as well as the ultimate protection from insider threats. In addition, Infotecs is at the forefront of applying and commercializing the use of quantum encryption.

“Infosecurity Europe was an excellent forum for us to share innovative solution examples from customers in industries as diverse as healthcare, critical infrastructure, oil & gas, financial services and government”, said Heather Colby, Strategic Board Advisor of Infotecs. “All of whom chose to look beyond the typical vendors to find a better approach to meet their information security challenges.”

About Infosecurity Europe

Strategically held annually in London, Europe's centre for technology start-up businesses, Infosecurity Europe is Europe’s largest and most comprehensive Information Security event. Featuring numerous analysts, policy experts, journalists and over 345 exhibitors, Infosecurity Europe presents an invaluable business platform, as well as staging the world’s largest complimentary conference programme containing eight specialist seminar streams, which have been accredited by leading industry associations (ISC)² and ISACA since 2012. The event attracts over 18,000 unique information security industry professionals attending from every segment of the industry from over 70 countries and presents the most important date in the calendar for information security professionals across Europe.
