

## Press release

### **Herth+Buss is the official distributor of the ClipFix<sup>®</sup> product range from Poppe**

With immediate effect, you can obtain the patented (ClipFix<sup>®</sup>) toothed clip rings and double-toothed clip rings made by Poppe GmbH through Herth+Buss Fahrzeugteile GmbH & Co.KG. Since 1911, Poppe GmbH has been among the leading manufacturers of elastomer-based seals and profiles. The application options developed by Poppe for the toothed clip rings and double-toothed clip rings are extremely varied. Among other things, they can be used as spacer and damper rings, or to connect lines or hoses made from metal, steel, elastomer or plastic. A partnership for the distribution of the ClipFix<sup>®</sup> product range has been in effect between the two firms since August 2018. ClipFix<sup>®</sup> rings from Poppe are a perfect fit in the comprehensive range of installation products sold by automotive parts specialist Herth+Buss. Herth+Buss has many years of experience in distribution and boasts significant expertise in marketing, sales and logistics thanks to its global sales and distribution network.
