

Press Release

VARTA Microbattery and VARTA Storage at the European Utility Week in Vienna

Ellwangen, November 2015

VARTA Microbattery and VARTA Storage are presenting their exciting new products at this year's European Utility Week from 03 to 05 November 2015. Visitors can look forward to intelligent metering energy solutions, brand-new powercaps and premium energy storage systems.

Reliable and sustained energy supply for smart meters

In Vienna, VARTA Microbattery will present its wide range of energy solutions for all smart metering systems, such as gas, water, heat and electricity meters, heat cost allocators and communication modules. VARTA Microbattery products represent a reliable and enduring energy source for smart meters. Even under extreme temperature conditions (from -55 to +85°C), these products can guarantee a trouble-free energy supply.

Premiere of the VARTA Powercaps – HVC Series

The new, impressive VARTA Powercaps from the HVC series will be presented to the public for the first time at the European Utility Week. "Our new powercaps combine the best of two worlds. On the one hand, their storage capacity is comparable with that of batteries, and on the other side the power output and charging speed are almost on the same level as those of a super condenser," explains Herbert Schein, CEO of the group of companies. In addition to their outstanding efficiency, the compact VARTA powercaps are also exceedingly durable, with over 550,000 charging cycles, and are highly versatile on account of their wide temperature range.

Energy storage systems for everyone!

The innovative energy storage systems exhibited in Vienna by VARTA Storage ensure reliability, independence and flexibility for your energy supply. All storage systems by VARTA Storage – from the new entry-level VARTA element storage system to VARTA home and VARTA family – are made in Germany, and will inspire you with their top quality, reliability and tested safety system. As the only producer worldwide of energy storage systems, VARTA Storage provides a guarantee of 14,000 charging cycles or a service life of 10 years for the home storage products VARTA family and home.

Visit us at the **A.n15** exhibition stand and experience our innovative products at first hand.

About VARTA Microbattery GmbH

VARTA Microbattery is one of the world's leading battery manufacturers. With production facilities and sales subsidiaries worldwide, we supply high-quality battery products to our customers in more than 100 countries around the world. The company is headquartered in Ellwangen, Germany. We develop and produce batteries for all major electrochemical systems and cell geometries. As a global system supplier, we are in a position to fulfill our customers' requirements all over the world.

About VARTA Storage GmbH

VARTA Storage GmbH is a leading company in the field of intermediate energy storage systems. The company is based in Nördlingen, Bavaria, and specializes in innovative Lithium-Ion battery storage.
