

Press Release

ThermoMed strengthens management

- ***Michael Löckener becomes additional managing director at the specialist's for actively temperature-controlled pharmaceutical shipments between 2 and 8 degrees***

Weinheim, 16. July 2018. As of this month, Michael Löckener has been strengthening the management of trans-o-flex ThermoMed, the logistics provider specialising in actively temperature-controlled pharmaceutical shipments. Within the trans-o-flex Group, the company is primarily responsible for the transport of refrigerated pharmaceuticals at 2 to 8 degrees Celsius. The management also includes Stefan Gerber and the two managing directors of the parent company trans-o-flex, Wolfgang P. Albeck and Christian Althaus.

While Albeck is Chairman of the Board and Althaus is responsible for finance and controlling issues, Löckener has taken on responsibility for sales, customer service and operations in the ThermoMed management. Gerber focuses on administration, vehicle fleet, quality and is responsible for the ThermoMed subsidiary in Austria.

The 55-year-old Löckener has been working for trans-o-flex since April 2015, to date in the function of Regional Operations Manager North. Prior to this, the logistics manager and transport economist worked for the logistics service providers Fiege, TNT and GLS.

About trans-o-flex:

The trans-o-flex Group's core competence focuses on the provision of logistic solutions for the pharmaceutical, cosmetics and consumer electronics industries as well on the transportation of other high-quality, sensitive goods. For the transportation of pharmaceutical products, trans-o-flex has built a nationwide network that includes active temperature control and full documentation. To this end, the company, in its Pharma Logistics business area, has installed transport systems that are suitable for the transportation of pharmaceutical products in the temperature ranges of between 15 and 25 °C and between 2 and 8 °C in compliance with the EU directives for the transportation of pharmaceutical products. In its Technology Logistics business area, trans-o-flex organises transports for customers from other industries, mainly consumer electronics. These customers also benefit from the high standards with respect to safety, hygiene, reliability and transparency which trans-o-flex has established for the pharmaceutical industry. In its Contract Logistics business area, trans-o-flex bundles services from storage and picking & packing up to individual value-added services. At an international level, trans-o-flex focuses on the implementation of logistic concepts via the networks EUROTEMP (temperature-controlled logistics) and EURODIS (in 36 European countries). Both nationally and internationally, trans-o-flex, in contrast to 100-% parcel services or forwarding

agencies, delivers both goods in parcels and on pallets and also offers special services, such as the transportation of hazardous goods (without being limited to small quantities), express and time-window deliveries, shipment consolidation as well as direct deliveries. Thus, the company covers the entire logistic chain from procurement and warehousing to distribution and fulfilment. In 2017, annual sales of the trans-o-flex Group, which has a workforce of approximately 2,060 employees, amounted to ca. € 459 million. For more information, go to www.trans-o-flex.com.
