

## PRESS RELEASE

# CONET presents UC Radio Suite (UCRS) at Critical Communications World in Barcelona

**CONET UCRS Unified API provides powerful interface for facilitating direct integration of most diverse information, control and communication systems**

**Hennef / Barcelona (ES), May 5th, 2015.** Community members from all areas of critical communications come together in May at the 17th Critical Communications World and accompanying TETRA World Congress. CONET will present its powerful integrated control center, conference and dispatching solution **CONET UC Radio Suite at Booth A611**. Special showcases will highlight CONET's new **CONET Mobile Command Flightcase** for heightened situational awareness and effective voice and data communications anytime and anywhere, supplementary integration modules CONET PPT Controller and CONET Mobile Radio Connector as well as the **CONET UCRS Unified API**. This powerful and fully documented application programming interface (API) enables a platform independent **interconnection between 3rd party communication platforms and customer applications**.

"The series of events organized by the TETRA and Critical Communications Association TCCA, of which CONET has been an active member for some months now, is the established flagship congress for all issues connected to TETRA digital radio as well as critical communications and infrastructures", **Michael Exner, Head of Integrated Communication Solutions** at CONET states. "As experienced at past Critical Communications World events and also their special events for Europe and the Middle East, in Barcelona we again expect a wealth of interesting talks and discussions as well as valuable new contacts to potential customers and partners."

### **About CONET UC Radio Suite**

In the daily challenges faced by public and industry control rooms and command centers alike, a reliable and efficient communication between all players via the most diverse communication channels is essential for effective decision-making and decisive action. The CONET UCRS communication solution combines integrated voice and video conferencing over diverse communication platforms (TETRA, TETRA-Pol, PMR, P25, DMR, GSM, GSM-R) as well as an extensive and powerful integration of communication, information and data systems, e.g. for controlling public sounding & alerting, traffic and facility management, and video surveillance.

### **About CONET**

"Success. Our passion." CONET currently ranks among the top 20 of German IT systems and consulting companies. The medium-sized IT group has been successfully offering support in SAP, Infrastructure, Communications, Software and Experts since 1987. Customers from industry and commerce, the public as well as defense and security sectors alike value CONET's commitment to quality and success. CONET product solutions for Critical Control Room Communications, IP Integration, Customer Collaboration, Enterprise Content Management and Business Process Management are in use worldwide. CONET currently employs more than 500 business and IT specialists at thirteen locations throughout Germany, Austria and Switzerland. Via an expanding partner network, CONET also offers system integration and support services globally, mainly across Europe, Middle East and Asia.
