

## **Solarfun to introduce 220 Wp series and BIPV solar modules at Intersolar 2008**

Qidong, China June 6, 2008 — Solarfun Power today announced the introduction of its 220 Wp product series and BIPV product line during Intersolar, Europe's largest solar exhibition, held in Munich, Germany from June 12-14, 2008.

Solarfun's 220 Wp series features a new, larger module design which offers increased power output. The larger modules utilize 156 mm<sup>2</sup> cells and have a maximum system voltage of 1.000 V. Solarfun's 220 series (mono and polycrystalline) will receive TUV/IEC 61215 certification to complement Intersolar 2008.

With reinforced frame and high quality glass, these higher power modules are ideal on all types of installations, from residential rooftop installations all the way to large industrial or solar field projects.

After a multi million Euros investment and countless hours spent in development and testing, Solarfun is ready to add BIPV to its product portfolio. Solarfun BIPV modules are formed by placing crystalline cells between 2 sheets of glass. This design allows sunlight penetration through gaps between the cells making Solarfun BIPV ideal for shading windows, replacing walls or skylights and creating transparent roofing structures.

Created to bring both renewable energy and aesthetic shaded area in a complete package, this product line was design with another crucial element to its success: flexibility. From the size of the module and type of cells to the spacing between cells, Solarfun BIPV modules can be customized to meet specific building and project requirements.

In addition to showcasing new product lines, Solarfun is looking forward to meet solar energy partners old and new at the Intersolar 2008: Hall B4 Stand 370.

### **About Solarfun:**

Solarfun Power Holdings Co, Ltd. manufactures ingots and PV cells and modules and supplies solar system integration services in China. The Company produces both monocrystalline and multicrystalline silicon cells and modules, and manufactures 100 % of its modules with in-house produced PV cells. Solarfun sells booth of the products through distributors and system integrators. The Company was founded in 2004 and its products have been certified to TUV and UL safety and quality standards.
