

Move forward with confidence – Bureau Veritas and HOYER continue to strengthen their longstanding cooperation

HAMBURG, July, 18th 2019 -- Representatives of both companies signed the contract on the continuation and expansion of the inspection volume for depots and equipment at the industry's leading trade fair Transport Logistic on June, 5th 2019.

The HOYER Group, one of the global leaders in logistics for the transport and handling of liquid goods, has been the trustworthy business partner of Bureau Veritas Industry Services GmbH already since 1999. Entrusted with around 300 inspections of dangerous goods containers at the beginning, the inspection volume now comprises more than 6,000 inspections in more than 30 countries worldwide. The spectrum ranges from periodic inspection of containers at defined service stations up to the voluntary inspection of tank containers (e.g. on and off hire, cleanliness).

For both HOYER and Bureau Veritas, efficient economic activities and sustainable, respectful interactions with people and nature go hand in hand. Both companies place a high value on safety and long-term customer relationships. Andreas Klatt, Director of Bureau Veritas Industry Services GmbH: *“We are very pleased at the trust HOYER has placed in us and the continuation of our partnership-based collaboration.”* *“The extension of our contract signals a new level of cooperation. Together with HOYER we will continue to develop our portfolio: thanks to our international network, we will now also inspect the condition of tanks and containers for moving dangerous goods e.g. in Africa”*, says Joachim Buerhop, Key Account Manager, Bureau Veritas.

Uncomplicated and fast cross-border communication is essential and made possible by our digital HERMES solution. Maintenance and repair work of all kinds of equipment is precisely recorded and documented here. In the future, interfaces to customer-specific systems will optimise the quality process to avoid disruptions to the supplier chain.

“HOYER is a specialist for sensitive and dangerous goods. We place the highest priority on safety and quality. We are very satisfied with the consistently high service performance of Bureau Veritas. Alongside periodic inspections, we consider the Bureau Veritas engineering team to be a reliable partner for demanding innovative projects. The contract extension is therefore simply consistent with this”, explains Marc Weidemann, Director Maintenance and Repair in the Netlog Business Unit of the HOYER Group.
