

**Advantech-DLoG to present
Industrial Fleet Management Solutions
at the IT-Trans 2014 in Karlsruhe**

Advantech-DLoG will be presenting its fleet management solutions (Hall 2; Booth C16) for the first time at the IT-Trans in Karlsruhe (February 18 – 20, 2014).

Germering, December 18, 2013 - The internationally renowned developer and manufacturer of vehicle computing solutions and industry PCs - Advantech-DLoG - is sharing a booth with GEVAS, a leading company for traffic engineering. International market leaders and key players in public transportation come together at the IT-Trans. This convention serves as a platform for the international IT industry for IT trends and innovations in the public transportation industry.

Advantech-DLoG will be giving visitors to this leading professional convention a look into its comprehensive product portfolio. Mobile hardware solutions act as a central computer unit that supports passenger information systems, security systems, and ITCS (Intermodal Transport Control Systems), among others. The TREK series makes various operating system platforms available (Windows, Android, Linux). The diversity of interfacing options allow the integration of various periphery systems such as cameras, ticketing systems, and vehicle data systems, so that drivers or back end systems can access them at any time.

The tablet PCs of the PWS Series, which are also supported by GPS, as well as the ultra-slim and robust UTCs for digital signage and digital guidance systems, round out the exhibition. Visualization terminals and information booths with touch screens are becoming ever more important as a way to relieve pressure on customer service personnel. Information systems that are easy to use and that guarantee efficient usage in compliance with security-related regulations are increasingly responsible for defining the IT maxim in public transportation. Advantech-DLoG is making its mark in this area.

About Advantech-DLoG:

DLoG GmbH, acquired by Advantech in March 2010, has become a member of the Advantech Group and is now the global Headquarter for Digital Logistics, which addresses vertical markets such as warehousing and distribution, fleet management and demanding industrial automation.

The DLoG GmbH was established in 1985 and has made a name for itself as a global player in the field of industrial PC and vehicle terminal solutions for extremely challenging environments - in construction machinery, forklifts, trucks, mining equipment and industrial production.

The new brand name of Advantech-DLoG combines the experience and market leadership gained by both companies in the past with the objective of turning Advantech-DLoG into a leading global provider for selected vertical markets such as warehousing, heavy goods management and fleet management.

Advantech-DLoG is the byword for cutting-edge sectoral innovation and a high level of quality. Within the framework of a comprehensive support, sales and marketing network, more than 3,600 employees are dedicated to providing swift time-to-market services for Advantech-DLoG's global customer base.
