

### *Intuition meets Intelligence*

## **United Planet and M-Files seal strategic partnership**

*The user is always at the center of good IT. This approach combines the portal technology Intrexx of United Planet and the Enterprise Content Management (ECM) of M-Files. Now the M-Files Adapter for Intrexx combines two powerful applications together.*

Freiburg, 05 December 2014. The ECM from M-Files improves and simplifies the management of documents and other information within the company. Thanks to this solution, customers gain in productivity and efficiency, without sacrificing essential compliance. M-Files eliminates "information silos" and allows users quick and easy access to relevant content from any system and equipment.

Through a uniquely intuitive approach based on managing information by "what" it is versus "where" it's stored M-Files achieves higher levels of user adoption resulting in faster ROI.

Now the smart and modern portal technology Intrexx developed by United Planet and the document management of M-Files can work with one another. A partnership of two recognized experts in their own field. Both companies have succeeded in obtaining listings in the current Magic Quadrants from Gartner for their respective technology area, which recognize the best solutions worldwide. United Planet has just received this listing for the third consecutive year.

Axel Wessendorf, founder and CEO of United Planet GmbH is convinced that the cooperation between the two IT companies will be very fruitful. "Our customers are naturally globally positioned. This globalization brings, depending on the industry and the size of the company, numerous standards and regulations that need to be taken into account when storing documents. The M-Files Intrexx Business Adapter can be connected with M-Files very quickly, which in turn ensures that industry standards are met. "Miika Mäkitalo, the CEO at M-Files, adds that M-Files customers with Intrexx now have the option to create custom web applications and, for example, to connect those web apps in a customer self-service portal with the documents from M-Files. "With Intrexx Share, our customers will also gain a revolutionary social business platform that can easily be linked with M-Files. Thus, our unique ECM is enriched with the social collaboration component of Intrexx."

---

The M-Files Adapter for Intrexx adds powerful enterprise content management capabilities to purpose-built web-applications on the Intrexx platform, and all of this without requiring any programming skills. Examples include CRM, project management, case management, ticket management and quality management.

Moreover, M-Files customers can utilize Intrexx Share as a social collaboration platform that displays all document activities from M-Files directly in the activity stream of Intrexx Share.

### About United Planet

United Planet, with over 4,800 installations and more than 1,000,000 users of its portal and integration software Intrexx in the German-speaking market alone, is one of the market leaders in the sectors covering small and medium sized undertakings, public administration, and organizations such as hospitals. The company is led by Axel Wessendorf, the founder of Lexware.

Using the platform-independent standard software Intrexx, web-based applications up to complete intranets/enterprise portals with advanced functionality can be created much faster, and thus more economically, than with similar programs. Intrexx facilitates the creation of productive workflows and the generation of mobile apps for smartphones and tablet PCs from all manufacturers. Existing data from ERP systems, Microsoft Exchange, Lotus Notes, and any JDBC and OData data sources can easily be integrated with Intrexx and set in relationship to each other. The SAP-certified NetWeaver Gateway interface simplifies connection to the SAP system in an unprecedented manner. Even the directly competing Microsoft SharePoint software benefits from business functionality enhancements through the OData interface. The data integration capabilities of Intrexx are increasingly used as middleware to take unwanted complexity out of existing and heterogeneous software environments.

With Intrexx Share United Planet additionally offers a social business platform, which stimulates the exchange of knowledge and team work among employees, and integrates existing enterprise software into the communication process. In the Intrexx Application Store you will find hundreds of ready-made apps and complete industry portals, ready to download now.
