

## The Lithuanian Air Force orders three Eurocopter AS365 N3 Dauphin helicopters

Marignane, France, October 28, 2013

**Eurocopter will supply three AS365 N3 Dauphin helicopters to the Lithuanian Air Force for a renewed countrywide search and rescue service with around-the-clock availability, adding another customer to the list of global operators using this twin-engine rotorcraft for vital life-saving missions.**

The Lithuanian contract – signed October 25 at the Lithuanian Ministry of National Defense in Vilnius – involves certain financing support from the European Union, and calls for all three helicopters to be delivered in 2015.

“Eurocopter will provide its full support to the settlement in Lithuania of this important new service, taking the AS365 N3’s already demonstrated mission capabilities in the most challenging operational conditions,” said Jacques Cardailiac, Eurocopter’s Head of Sales Northern Europe.

“The new helicopters will help to fulfil search and rescue missions and perform environmental monitoring and control which are of high importance for Lithuania. Therefore, by signing this contract today we assure that the Lithuanian Armed Forces will be able to help saving people’s lives and promptly respond to various crises in the future, “ Marijus Velička, National Defence Vice Minister said at the signing ceremony.

In addition to their search and rescue duties, the Lithuanian Air Force’s AS365 N3 Dauphins will be available for tasks such as observing the effects of drought and floods, tracking crop conditions and plant disease, as well as the monitoring of marine pollution and other environmental dangers.

The 4.5-ton class AS365 N3 retains the distinctive shape of Eurocopter’s Dauphin family and incorporates the company’s Fenestron shrouded tail rotor. Dauphin helicopters have been in service with some 300 customers in 69 countries – among which are 200 Dauphin helicopters operating search and rescue missions. The total Dauphin fleet has accumulated more than five million flight hours.

Within the Eurocopter’s Dauphin helicopter product line, the AS365 N3 is widely operated around the world by military, parapublic and civilian operators, performing search and rescue missions such as the Navies of France, Bulgaria, as well as the Japan’s Fire and Disaster Management Agency.

When delivered to Lithuania, the three new AS365 N3 rotorcraft will join the Eurocopter EC120, EC135 and EC145 helicopters currently used by the Lithuanian Border Guard for security and law enforcement duties.

**About Eurocopter**

Established in 1992, the Franco-German-Spanish Eurocopter Group is a division of EADS, a world leader in aerospace and defense-related services. The Eurocopter Group employs approximately 22,000 people. In 2012, Eurocopter confirmed its position as the world's No. 1 helicopter manufacturer with a turnover of 6.3 billion Euros, orders for 469 new helicopters and a 44 percent market share in the civil and parapublic sectors. Overall, the Group's helicopters account for 33 percent of the worldwide civil and parapublic fleet. Eurocopter's strong international presence is ensured by its subsidiaries and participations in 21 countries. Eurocopter's worldwide network of service centers, training facilities, distributors and certified agents supports more than 2,900 customers. There are currently more than 11,780 Eurocopter helicopters in service in 148 countries. Eurocopter offers the most comprehensive civil and military helicopter range in the world and is fully committed to safety as the most important aspect of its business.
