Medical first-aid support: Rheinmetall to deliver up to 120 rescue stations to the Bundeswehr

The Federal Office for Bundeswehr Equipment, Information Technology and In-Service Support (BAAINBw) has commissioned Rheinmetall to deliver up to 120 rescue stations to the Bundeswehr. The order will be booked in January 2025 and values in a high double-digit million euro range. Delivery of the initial ten ballistic protected and six unprotected systems is scheduled between 2025 and 2027.

The contract also includes an option for a further 104 armoured and unarmoured systems, as well as corresponding training for the appropriate personnel. The highly mobile aid-stations are used by the Bundeswehr medical service to provide surgical and internal emergency care for the armed forces. If need be, the systems can be set up and dismantled within the shortest possible time.

Each system includes an air conditioning unit, a power generator and an emergency surgery container equipped with the latest medical instruments. The aid-stations are part of the Bundeswehr's Modular Medical Facilities (MSE) system.

► Key facts

- Rheinmetall delivers up to 120 aid-stations to the Bundeswehr
- Delivery as of December 2025
- A total of 16 armoured and unarmoured systems already on fixed order
- Contract value in the high double-digit million euro range
