

Laser Optics Catalog

88 Pages Full of Possibilities

With the latest edition of its laser optics catalog, LASER COMPONENTS provides an overview of its extensive range of coating methods and designs as well as substrate materials and shapes.

LASER COMPONENTS manufactures tailor-made laser optics according to customer requirements. Therefore, the 88-page brochure features very few off-the-shelf products, but focusses on the scope of technological options. Out of these countless possible combinations, the company and its customer develop the best solution for the desired laser mirrors, thin-film polarizers, Gaussian mirrors, and numerous other optics.

The catalog is available to download on the LASER COMPONENTS website, or can be ordered as a free printed version.

LASER COMPONENTS will present a selection of laser optics at SPIE Photonics West, booth 1931.

The Company

LASER COMPONENTS specializes in the development, manufacture, and sale of components and services in the laser and optoelectronics industry. At LASER COMPONENTS, we have been serving customers since 1982 with sales branches in five different countries. We have been producing in-house since 1986 with production facilities in Germany, Canada, and the United States. In-house production makes up approximately half of our sales revenue. A family-run business, we have more than 220 employees worldwide.
