

Some things are just too important  
to let anybody pack

## Kromasil® HPLC columns: Now only available as the original

No major complaints from the users. No alarming reports from the distributors. Still we've decided that from now on, full responsibility for the packing of all Kromasil® HPLC columns will rest with us. Why?

The reason is simple: When you buy a product with the Kromasil name you expect top performance. Time and time again. Without exception. And the only way for us to make sure you get just that is to keep track of every step in the manufacturing process.

In addition, we've appointed a number of dedicated original Kromasil HPLC column distributors. Whoever you turn to, you'll get great support.

Our columns are world-famous for their long lifetime, top performance and high reproducibility. By taking full responsibility for all steps in the manufacturing process, including the packing of columns, we have done all in our power to secure the quality and supply of this excellent product.

So go for the original. It's just become even better.
