

Ilsfeld-Auenstein, 24. April 2008

Dear Madam and Sir,

not only are we celebrating our tenth year of research, development, and production of the patented liquid wood **ARBOFORM®**, now we can add another very prestigious award to our list of accomplishments:

Last week, on April 17th, the state network of VR-Banks awarded Tecnaro GmbH the

Top Award for Innovation 2007

in recognition of its development of the liquid wood material **ARBOFORM®**.

You might enjoy the photos and video clips on the following web pages, even if they are all in German: www.innovativer-mittelstand.de and <http://www.geno-stuttgart.de/10321.asp>.

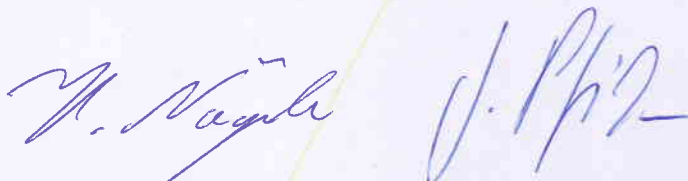

Without the support of our customers, partners, and financial institutions, without your interest and willingness to try out alternative materials, Mr. Pfitzer and Mr. Naegele could never have developed and marketed these innovative products nor could they continue to diversify and research the family of liquid wood materials and their applications. We would like to extend our sincere and heartfelt gratitude to all of you!

This award translates into additional motivation for us, it encourages further innovative ideas, and honours Tecnaro's research into using renewable resources for the production of thermoplastic materials which combine ecological principles with technological and economic feasibility. You are a vital part of this process!

Based on our successful cooperation in the past and your continued support, we look forward to presenting you with more innovative concepts and materials in the future, truly in the spirit of this award.

With our most sincere regards,

Helmut Naegele, Juergen Pfitzer and the Tecnaro Team
