Meshed Systems starts cooperation with MTI

25. Mai 2009, München-Ottobrunn (D), Tel Aviv (Israel): Meshed Systems GmbH (www.meshedsystems.com), a leading Value Added Reseller (VAR) of RFID components and MTI Wireless Edge Ltd. (www.mtiwe.com), a leading developer of flat panel antennas for RFID and Fixed Wireless applications today announced the start of a partnership resulting in Meshed Systems integrating MTI antennas in their long range RFID products and solutions.

The large scale of the RFID antenna portfolio from MTI Wireless Edge will enable RFID system integrators and solution providers, the principle customer group of Meshed Systems, to tailor high end RFID systems for a variety of applications such as asset tracking, yard management and logistics in general.

Dr. Michael E. Wernle, CEO of Meshed Systems GmbH, said, "We started to qualify MTI antennas several months ago and tested the MTI antennas in various applications. Based on the excellent results both in performance and quality we are very glad about this cooperation with a designer and manufacturer of high sophisticated antenna technology."

The German RFID market is growing quickly and we see a lot of opportunities and potential there. Meshed Systems has excellent presence in the RFID German market and this partnership will allow us to continue and to increase our position as a leading RFID antenna supplier, said Dove Feiner, CEO – MTI Wireless edge.

About Meshed Systems

Meshed Systems (Germany) is a Value Added Reseller (VAR) and Consulting Enterprise for RFID components. Meshed offers advice and consultancy services to ensure the correct selection of RFID components, for individual customer requirements within both industry and retail sectors. The company is active in Middle Europe, mainly in the German speaking countries (Germany, Austria, Switzerland) and additional in Scandinavia and the (South) Eastern countries of Europe. Meshed Systems supplies a powerful selection of all hardware elements required for delivery of the complete RFID project, and only work with "best of breed" hardware partners. Customers are both system integrator clients and other Industry Partners alike.

About MTI Wireless Edge Ltd.

MTI Wireless Edge, a leader in the development, production and marketing of high quality, low cost, flat panel antennas for RFID & Fixed Wireless applications offers large portfolio with over 90 models of Linear and Circular, Single and Dual polarity and Near Field antennas for active and passive RFID Systems. The frequencies that MTI offer antennas for are 450MHz, 865-870MHz, 902-928MHz, 950-956MHz, 2.4GHz as well as Integrated Enclosure Antenna solution (IAE). MTI Military products include a wide range of broadband, tactical and specialized communications antennas, antenna systems and DF arrays installed on numerous airborne, ground and naval, including submarine, platforms worldwide. www.mtiwe.com
