

**Press Release**

Munich, June 1, 2011

**Knorr-Bremse Commercial Vehicle Systems voted “Best Brand” for the sixth time in succession**

Once a year, publishers ETM and the DEKRA technical inspectorate ask the readers of commercial vehicle trade magazines *trans aktuell*, *lastauto omnibus* and *FERNFAHRER* to name the best commercial vehicles and the industry’s best brands. For the sixth time running, in the voting for the best brands of 2011, Knorr-Bremse came out top in the “brakes” category.

As in previous years, more than 8,000 readers sent in their votes. At the official awards ceremony on May 31 in Stuttgart, Knorr-Bremse again picked up the prize in the “Brakes” category. Watched by over 300 representatives of all sectors of the commercial vehicle industry, Klaus Deller, Knorr-Bremse AG board member responsible for Commercial Vehicle Systems stepped up to receive the award. “Winning this award is particularly gratifying because we’ve been chosen by experts in the field who deal with vehicles, products and services in their day-to-day work and really know what they are talking about. Once again, this year we’d like to thank all those who voted for us – both for the award and above all for the trust they place in us,” said Deller.

Within the industry these awards are considered a proven seal of quality and stand for the high safety and reliability of the products concerned. They also represent a key indicator of the acceptance and image of the brand. “Being named best brand for so many years in succession makes us proud as a company. It also spurs us on to continue investing our knowledge and experience in producing innovative and competitive system solutions and services that set the standards in the marketplace and make for greater road safety,” added Deller. “In the future, in close cooperation with our customers, we at Knorr-Bremse will be sparing no effort to do just that.”

**The Knorr-Bremse Group** is the world’s leading manufacturer of braking systems for rail and commercial vehicles. For more than 100 years now the company has pioneered the development, production, marketing and servicing of state-of-the-art braking systems. Other lines of business in the rail vehicle systems sector include automatic, electro-pneumatic or electric door systems, air conditioning systems, control components and windscreen wiper systems, as well as platform screen

doors. In the commercial vehicle systems sector, the product range includes complete braking systems with driver assistance systems, as well as torsional vibration dampers and powertrain-related solutions such as the Pneumatic Booster System (PBS) and transmission control systems for enhanced energy efficiency and fuel economy.
