The future of green investments

The year 2016 brings substantial changes in the matter of investments in renewable energy. At the moment, we do not know when the first auction will be run or whether it will be the only one in 2016. For the time being, we also have no platform which will provide support for auction offers. During our event we will show how to prepare for the auction, how to calculate the maximum public support and which strategy to adopt at the start of the auction. We will also try to answer the question of whether the new support system will not impede the investments in new powers and how it relates to the objectives set for Poland by the European Union. **Facing numerous problematic issues, we have decided to organize a conference "The future of green investments in the light of the RES Act." The event will be held on April 14 at the Municipal Stadium in Wrocław, during the International Trade Fair for Renewable Energy Sources and Energy Efficiency „InEnergy”.**

The program will include, among others:

- **Auction system for RES:**
 - legal basis regulating the support systems for RES,
 - European Union regulations,
 - relevant executive acts,
 - documentation relating to the auction system,
 - project profitability in the auction system,
 - how to prepare in order to place the offer,
 - selection of the parameters allowing to win the auction,
 - formal requirements for the auction offer,
 - content of the auction offer,
 - reference prices - commentary by industry chambers,
 - different registration stages,
 - criteria for final decision, premises for cancelling the auction, reasons for rejecting the offer.

- **Public support for RES:**
 - public support acceptable by European Union,
 - Polish regulations regarding the maximum of public support,
 - public support in the RES Act,
 - horizontal public support for RES,
 - examples of calculating the maximum public support for RES when placing the auction offer,
 - subsidies for RES - national and EU resources.
- **RES microinstallations:**
 - investments financing,
 - prosumer program,
 - feed-in tariffs,
 - off-grid or on-grid installation,
 - choice of optimal technology.

The conference is addressed to: producers of energy from renewable energy sources, industrial consumers, conventional energy consumers, sewage treatment plants, waste treatment plants, waste incineration plants, public administration units, foundations, association, and everyone interested in the topic of RES in Poland and around the world.

***We are planning the participation of guests from abroad, therefore, together with *REECO Poland*, we will provide simultaneous translation.

The seminar will be held during the **International Trade Fair for Renewable Energy Sources and Energy Efficiency „InEnerg”**, in the **VIP section of the Municipal Stadium in Wrocław, situated on Aleja Śląska 1.**

The cost of participation in the conference

- **196,80 EUR** Registrations until 29.02.2016 r.
- **246,00 EUR** Registrations up to 29.02.2016 r.
- **196,80 EUR** Price with code
- **123,00 EUR** Students with valid ID
