

Preliminary Report for oswald

GLOBALBLOCK

GlobalBlock Standard can block

608 Domains

using **one** of the main labels below. You can choose to block all of the main labels using GlobalBlock+.

GLOBALBLOCK⁺

GlobalBlock+ can block up to

41,278 Domains

using **all** the main labels below and the variations of your brand we automatically generate for further protection*.

* A sample of variants labels is provided at the end of this report and in the accompanying data file.

Main Labels

oswald

Unmatched Online Brand Protection and Security

Key GlobalBlock Features

UNPRECEDENTED PROTECTION

GlobalBlock is the largest domain blocking service in the world. With GlobalBlock's real-time blocking solution, your brand can stay protected across 600+ domain extensions in a wide range of namespaces, including extensions your brand isn't eligible to register.

EXPANDING COVERAGE

GlobalBlock, backed by the Brand Safety Alliance team of industry experts, is dedicated to keeping your brand protected as the digital landscape evolves. Our mission is to continuously expand our coverage to add as many TLDs as possible, including legacy, new gTLDs, and TLDs to come in the next ICANN round.

PRIORITY AUTOCATCH

Stay ahead of bad actors with our groundbreaking Priority Autocatch feature. If a previously unavailable domain matching your brand becomes available, our proprietary technology allocates it to your account before it can be caught by other drop catching services or savvy squatters.

DOMAIN ASSURANCE

Automatic Domain Assurance is your domain management safety net. It automatically secures any domain within your portfolio that matches your brand, safeguarding you from the risk of missed renewals or deletions. Your brand's digital assets stay protected, effortlessly.

DOMAIN UNBLOCKING

GlobalBlock gives you ultimate control of your domain portfolio. Found a use for a blocked domain? With Domain Unblock, easily activate or retire domains as needed, without complicated buy-backs or disputes.

Safeguard Your Brand Across 600+ Domain Extensions

GlobalBlock is the largest blocking product on the market and is continually expanding its coverage for no additional cost during your purchase term. Included TLDs cover gTLDs (ex. .biz, .info, .mobi), new gTLDs (ex. .app, .reviews, .careers), ccTLDs (ex. .us, .cr, .ac), and Web 3.0.

Summary of domains that are currently registered or reserved

Our systems have run a preliminary search to see what we can block for you and found that these names are currently registered or reserved.

We've included some more information to help identify if you own these domains or if they are held by a third party.

FAQ's

What is a 'main label'?

A 'main label' is BSA terminology for your rights displayed in DNS permissible characters; that is characters that are allowed to form a domain name; that is, characters that are allowed to form a domain name, e.g., the main label for the trademark "Example & Name" would be "exampleandname".

What is a 'variant label'?

A 'variant label' is variations of a main label that includes easily confusable characters, such as the main label "exampleandname" having the character "e" replaced with the character "3" to form the string "3xampl3andnam3".

These labels are generated using a proprietary digital library, based on a main label, which is modified, replaced, or reordered using characters known to be used in homoglyph attacks, typosquatting and other malicious activity used to confuse internet users.

What is 'Summary Of Domains That Could Not Be Blocked'?

Domains that could not be blocked are domains that are either registered, reserved or prohibited in the corresponding TLD which cannot be blocked as part of the GlobalBlock Service. GlobalBlock's Priority Auto-Catch service will be enabled as part of a GlobalBlock order.

What is Priority Auto-Catch?

This is a mechanism placed in the participating registry by the BSA that catches a domain name the instant it becomes available once the redemption period has ended. The label will be added to your GlobalBlock for the remainder of the block registration service period.

What is the list of 'TLD's and Extensions'?

This is the current list of extensions covered in the GlobalBlock service.
