FOR IMMEDIATE PUBLICATION

Desktop LCDs and Solutions with LED Backlights

Canvys – Consultation, design, development and implementation of comprehensive visual technology solutions for health care, Original Equipment Manufacturers (OEMs) and digital signage applications

Donaueschingen – 01.12.2010. Canvys announces the new 12.1" and 15" desktop LCDs with LED backlight technology.

These displays offer high-contrast values, wide-viewing angles, guaranteed durability and intense brightness. With LED backlight technology, contrast ratio, brightness and viewing angle measurements improve when compared to CCFL. For example, the 12.1" panel offers a contrast ratio of 700:1 versus 600:1, brightness levels of 450 nits versus 400 nits and viewing angles of 160°/140° versus 140°/110°. For larger orders, Canvys also offers the integration of LED panels for all its 12" and 15" LCDs.

Other design highlights of this LCD display series:

- Extended product life expectancy
- Integration of touch screens and safety glass
- Customized designs (housing, color, logo, etc.)

Samples are available upon request.

Technical details and prices can be obtained upon request.
