Laser 2000 GmbH is expanding its product portfolio with Photonic Products Ltd.

Laser 2000 GmbH is expanding its product portfolio through a distribution agreement with Photonic Products Ltd. to meet the rising demand and strong growth in the markets of Alignment, Visualization, Biotechnology; Medical Systems and many other growing industrial applications.

According to the terms of this agreement, Laser 2000 GmbH will distribute the Photonic Products Ltd. modules to customers in Germany, Austria and Switzerland.

Photonic Products Ltd., located in Hatfield Broad Oak near London, UK is a leading provider of Custom Designed Laser Diode Modules. It is expanding its sales exposure by utilizing the broad experience that Laser 2000 GmbH has in these applications.

Tony Pope, Managing Director of Photonic Products Ltd. stated that the agreement is a milestone in the sustained development of Photonic Products Ltd., which is ideally positioned to take advantage of the strong growth of the targeted markets being a part of the Stocker Yale Group. Establishing this new partnership with Laser 2000 GmbH greatly helps to increase its customer base and focus on its core business, designing high performance custom designed electro-optical sub-assemblies and optoelectronic components based on semiconductor laser diode technology, which delivers performance and manufacturing efficiencies to OEM companies.

About Photonics Product Ltd.

Photonic Products is an ISO9001:2000 certified manufacturer of laser diode modules. Products include TE cooled laser modules, laser alignment systems, circular beam laser diode modules and elliptical beam modules, receptacle packaged laser diodes and pigtailed laser diodes, LEDs, and precision optical lenses to the industrial, medical and scientific markets.

Photonic Products was established in 1995 and has operations in the United Kingdom, the United States and Germany. It is a StockerYale company.

It has twice been honoured with a Queen's Award for Enterprise : International Trade.

About Laser 2000

LASER 2000 GmbH specializes in distribution of laser sources, accessories, components and instrumentation in the area of industrial vision equipment, fibre optics, instrumentation, telecommunications, measuring devices, scientific research etc.

LASER 2000 GmbH comprises of 60 people, within four locations in Germany. A highly skilled technical Sales Team as well as a dedicated Customer Support Team provides its clients with the highest level of service and Know-How. Equipped with a laser applications room, an electronics lab, an ESD area, local inventory and spare parts the clients have a strong local partner that is highly focused on customer satisfaction. For more information, please visit our Website: www.laser2000.de
