### ITW Waterproof Switches Offer Protection to IP67 and Switching Currents of up to 10A

The Series 49-59 is a range of momentary action, IP67 rated, pushbutton switches. The range consists of both fully-sealed and panel sealed versions.

The flying lead version of the switch fits neatly into a 8mm thick (max) panel.

Held in position by a snap-fit retaining mechanism, the microswitch version has a maximum current rating of 10A and the advantage of SPDT-DB contacts to cover all circuit requirements.

The Series is available with a choice of round or square bezels and with or without status illumination. The body and button are manufactured from hard-wearing PBT.

Temperature range of upto +105 degrees C is an additional advantage of this series of switches.
