

Through the serial number direct to the product data

Klingenberg, May 2014.

WIKA has set up a new internet service for users of both model A-10 and model S-20 pressure transmitters: All individual product data are now available on the microsite <https://portal.wika.com/serial/>.

Customers can retrieve the information either by entering the serial number, or – just recently – a QR code on the included test report. This way, they get a direct access to all item details, links to the data sheet and operating instructions as well as the ability to download test reports and certificates. A successful access to the new web application also confirms that the instrument supplied is an original product from WIKA.

Number of characters: 708

Key words: Microsite serial number
