First sales of Draco ultra DisplayPort extenders

Dr. Enno Littmann, MD of IHSE (left), and Bauke van de Zand, Sales Manager of Intronicus signing the contract

Oberteuringen, December 18, 2015. IHSE reports first orders for the new Draco ultra DisplayPort KVM extender from Intronicus for use in port vessel movement monitoring.

The Draco ultra is unique in its ability to transfer video at 4K 60Hz full colour 4:4:4 over a single fiber cable.

Dr. Enno Littmann, Managing Director of IHSE, said: “4K is gathering momentum in the broadcast and professional AV markets. The Draco ultra is the first in a new generation of digital KVM extenders using the innovative lightweight image (Lici[®]) codec developed in corporation with Fraunhofer IIS and the Altera DisplayPort 1.2 IP core.”

Thomas Rouw, business development manager for Intronicus said: “It is essential that the highest quality image is available to operators in this application, which is what the new Draco ultra DisplayPort extender from IHSE provides.”

About IHSE

IHSE is a leading developer and manufacturer of advanced Keyboard, Video, Mouse (KVM) devices with 30 years of experience. KVM technology enables the remote switching, bidirectional extension and conversion of primary computer signals including DVI, HDMI, 4K DisplayPort, digital audio and USB. IHSE develops and manufactures an extensive range of KVM switches and extenders with visually lossless signal transmission from headquarters near Lake Constance, Germany.

IHSE products have been certified for outstanding manufacturing quality, operability, resilience and high transfer speeds. Many renowned companies and institutions across vertical sectors including Broadcast, Post Production, Control Rooms, Banking, Industrial, Healthcare, Maritime, Education, Venues, Air Traffic Control and Government rely on KVM solutions made by IHSE, Germany.
