

International Conference Advanced Suspension Systems USA

The first USA forum focusing on advanced suspension technologies – electronics, electrification, chassis control, autonomous cars and light weight materials

17/04/2019 – Taking place from the 30th July to the 1st of August in Ann Arbor, Michigan, the first International Advanced Suspension Systems Conference will bring the next generation suspension systems to enhance quality of suspension, chassis and vehicle dynamics. Industry professionals from OEMs, Tier 1's and valuable component solution providers will come together to exchange knowledge, ideas and real-world strategies for the competitive chassis industry.

A simple, cost-effective spring, and shock suspension system is no longer the only determinant to achieve customer satisfaction. Thus, we treat suspensions as one of the most important components of the chassis – rather than an auxiliary system. As electronics, electrification, chassis control, autonomous cars and lightweight design have all become immanent influencers. What trends shape the suspension systems industry?

IQPC's conference highlights The State-of-the-Art suspension technologies, advances in vehicle dynamics control, and lightweight technology. This conference will answer you the following questions, among many others:

- Latest developments and future trends in semi-active and active suspensions
- Optimal approaches to the integration of electronics systems
- Innovations in lightweight technology for light and heavy duty vehicles
- New methods in vehicle dynamics control for increased comfort and safety

The International Suspension System Conference is the USA's meeting point focussing on advanced suspension technologies, which connects delegates from all over the world to discuss the state-of-the-art suspension technologies. Join the conference in Ann Arbor, USA to become part of the suspension systems shift and benefit from new innovations that can help you to enhance customer satisfaction!

This expert forum will bring together major players of the suspension system industry such as **Tenneco Automotive Belgium, Innovation and Technology Gabriel India Ltd. India, LLC USA** and **many more**.

About IQPC: IQPC provides business executives around the world with tailored practical conferences, large scale events, topical seminars and in-house training programs, keeping them up-to-date with industry trends, technological developments and the regulatory landscape. IQPC's large scale conferences are market leading "must attend" events for their respective industries. IQPC produces more than 1,500 events annually around the world, and continues to grow. Founded in 1973, IQPC now has offices in major cities across six continents including: Berlin, Dubai, London, New York, Sao Paulo, Singapore, Stockholm, and Sydney. IQPC leverages a global research base of best practices to produce an unrivalled portfolio of conferences.
