

## LogiMAT Stuttgart 2025: CIM – a leader in innovation and WMS technology

**Software company CIM GmbH will be attending LogiMAT from March 11 to 13, 2025, to showcase the features of their fully configurable warehouse management software PROLAG World. The system maps all the requirements of modern intralogistics. Whether warehouse management, automation, hazardous goods management, production, shipping or transport – CIM provides optimal, sustainable and economical solutions for all of these segments. You'll find the CIM team at their usual spot in hall 4, booth D410.**

PROLAG World is fully browser-based and can be used as a cloud, on-premises or mobile solution. It offers a host of standardized process flows which have been tried, tested and optimized by CIM's logistics experts. High levels of standardisation mean shorter project schedules and minimum go-live risks.

### **Pioneers in technology**

The team at CIM has once again upgraded PROLAG World with innovative features and functions. These enhancements provide even more options for optimizing warehouse management processes, further boosting efficiency and flexibility. The enhanced **packing area** and **warehouse billing** features will take centre stage at LogiMAT. The functionality for storage warehousing cost management has been extended with additional features, now offering maximum flexibility in invoicing and a fast, intuitive billing process.

With the enhanced packing area functions now available in PROLAG World's optimized, user-friendly interface, CIM offers an efficient and flexible solution for the packing process. These functions facilitate intuitive control of all packing steps, optimizing processes and workflows in the warehouse. Thanks to the high level of flexibility, companies can implement individual shipping requirements accurately and with minimal effort.

Trade show attendees are invited to visit CIM's booth where they can experience the latest features and innovations first-hand.

### **A special anniversary: 40 years of CIM GmbH**

2025 marks a special milestone for CIM GmbH as the company celebrates its 40th anniversary, highlighting its long-standing role as a pioneer in intralogistics. These four decades of success have been characterized by continuous innovation, strong customer and partner relationships and the development of trailblazing solutions.

This anniversary is not only a reason to celebrate but also a springboard for the future: With renewed energy and a sharp focus on technological advancement, the company remains committed to setting industry standards. Visitors to LogiMAT are warmly invited to be part of this success story and explore the latest innovations and highlights in PROLAG World.

You'll find CIM at booth 4D10 in hall 4 again this year. Secure your free trade fair ticket and make an appointment with one of their logistics experts.

## CIM – LOGISTICS SOFTWARE SPECIALISTS

CIM is a leading provider of intralogistics systems. Its warehouse management system PROLAG World is one of the most successful standard systems on the market. The WMS is fully configurable and optimizes inventory and material flow whatever the warehouse layout. PROLAG World stands out for its modular design, providing maximum flexibility and 100 % transparency across all internal processes and goods movements. With 40 years of market presence, CIM is a pioneer in the development of specialized software for warehouse management. The family-owned company has its head office in Fürstenfeldbruck near Munich, and employs around 100 intralogistics software experts with specialist knowledge and expertise across all industry sectors.
