

1 March 2016

RS36 – Reload Swiss RS débuts new long gun powder at the IWA&Outdoor Classics 2016

RS36 is the new long gun powder from Reload Swiss RS, the Nitrochemie Wimmis AG brand for high-performance propellant powders. It will be presented to the public for the first time at the IWA&Outdoor Classics 2016 in Nuremberg.

The new RS36 enables shooters to enhance their handloads even further in the range between the current long gun powders RS30 and RS40. It has been optimised for calibre 7.62 x 39 mm, but is also ideal for handloads in the lever-action segment - such as .30-30 Winchester, .444 Marlin or .45-70 Government. This extruded single-base nitrocellulose powder is also suitable for .222 Remington and .223 Remington with light bullets up to 50 grains. The camphor-treated surface makes possible a balanced temperature response with moderate pressure at higher temperatures. RS36 will be available through the proven Reload Swiss RS distribution network as of spring 2016.

This year as well, the Reload Swiss Team will be on hand at the IWA&Outdoor Classics, Europe's largest specialist trade show for shooting, hunting, outdoor gear and official security applications. At Europe's largest and most important trade show for sport shooting and hunting, visitors from all over the world will have an opportunity to learn about RS36 and all other quality Reload Swiss RS products in hall 7, booth 7-226 from Friday, 4 March 2016 to Monday, 7 March 2016. We're looking forward to seeing you at our trade show stand in Nuremberg!

About Reload Swiss RS

Whether for sport shooters or hunters, handguns or long guns and whatever the discipline or use – Reload Swiss RS offers the right propellant for all custom handloads. Uniform quality and burn performance enable precise, highly repeatable hits – under the most varied weather conditions.

Internationally acclaimed Nitrochemie Wimmis AG is a joint venture of Rheinmetall and RUAG that specialises in propellants.

This company devotes its 100 years of experience with high-performance propellants to the development and manufacture of Reload Swiss RS products. The state-of-the-art production equipment meets demanding standards for the safety of people and the environment. Constant quality assurance from production to packaging ensures uniform fabrication quality for the most demanding shooters. Altogether, the result is excellent value for money and extreme accuracy.

A high-performance distribution network throughout Europe makes for reliable availability. Reload Swiss RS products have already earned the confidence of some of the world's top competitive marksmen. Swiss top shooters Dominic Meier, Christine Burkhalter and Peter Heller as well as Sascha Back and Nils Nothnagel of Germany and Austrian contender Gerald Reiter are just some of the prominent shooters who depend on Reload Swiss RS. Renowned English long-range marksman Nigel Cole-Hawkins is also a member of the top shooters team. Additionally, the German company teams from H&K and the Korth team have recently begun competing using Reload Swiss RS, as has the ZMA team from Denmark. Not to mention Reinhard "Hady" Lang, who won the gold medal in the F class at the European championships in Bisley, UK, using RS70!

Nitrochemie and its distribution partners are always at our customers' service when it comes to sharing load data, tips and experience, so as to continually expand and spread the knowledge base of Reload Swiss RS products.
