

Press release

New touch operating concept for the bestseller among the battery operated hand-held marking systems

FlyMarker® mini 65/30 4.3" touch with touch user interface and large 4.3" display

MARKATOR® is always striving to improve its product range, to make existing ones even more effective and to respond to customer requirements. Always with a focus on improving functionality, operability and precision, for perfect marking on various workpieces and materials.

The result of the latest development is the mobile dot peen marker FlyMarker® mini 65/30 4.3" touch! With its new touch operating concept, customers are offered a modern upgrade and operation is simplified even further. The FlyMarker® mini 65/30 4.3" touch has a large 4.3" color display and a touch user interface, which, thanks to intuitive software and a newly designed main level, makes programming easi

er and faster. Not only has the visual appearance of the FlyMarker® mini 65/30 4.3" touch changed, but a faster processor with 4 GB memory capacity has also been implemented. This new processor technology allows a smooth menu navigation and increases the boot time enormously.

At its core, the FlyMarker® mini 65/30 4.3" touch has the same features that makes the FlyMarker® mini 65/30 model a bestseller. These include 100% mobility, light weight and
