New Website of Auconet GmbH

Berlin, 27.05.2019 - Since today AUCONET presents itself in the Internet from a completely new side: www.auconet-it.de. With a clear design and modern harmonious structure, the facelift of the website has brought about great visual changes. Now the homepage scores with completely new content and clear subject areas. The dynamic web design gives customers an intuitive overview of the Auconet solution and product portfolio as well as the company.

Auconet BICS [Business Infrastructure Control System] offers a new, vendor-independent approach to controlling complex networks. The core functions include recognition of network devices and connections as well as the connected end devices, real-time visualization of the infrastructure topology as well as event and alarm handling. All this is controlled from a central point by a modern graphical user interface.

BICS offers IT administrators comprehensive options for managing an IT network, ensuring availability and functionality, monitoring individual network components and protecting networks from unauthorized access.

"The completely redesigned website is our most important digital communication channel. It shows very clearly how we help our customers manage their IT infrastructure. Customers can both reduce their network management costs and ensure the constant availability of individual network components at the same time," says Hartmut Bolten, Managing Director of Auconet GmbH.

Further information and details about Auconet are available at <https://auconet-it.com>

About Auconet

Auconet was founded in 1998 by a German engineering team with deep expertise in IT Operation Management. The company provides information technology solutions and offers network management, network security, IT infrastructure management, cloud, network automation, and business infrastructure control solutions.

Auconet BICS is the Next-Generation ITOM platform to control large & heterogeneous enterprise networks. BICS not only provides network infrastructure management for all vendors' devices and endpoints, but also serves as the foundation for a new generation of IT infrastructure management.

Auconet became part of Beta Systems Group in early 2018.

About Beta Systems DCI Software AG

Beta Systems DCI Software AG has been developing high-quality infrastructure software products and solutions for the reliable and efficient processing of large quantities of data for over 35 years, providing our customers with the means to best fulfill all legal and corporate requirements. Our multi-platform software solutions for z/OS, Unix, Linux and Windows environments automate, document and analyze business-critical IT processes in data centers of large corporations, IT service providers, public-sector institutions and mid-sized companies. Beta Systems' data center intelligence portfolio focuses on output management & archiving, log/security information management, workload automation and job management.

Beta Systems Software Aktiengesellschaft (BSS, ISIN DE000A2BPP88) was founded in 1983, is listed in the Scale segment of Deutsche Börse and employs more than 300 people companywide. Company headquarters are located in Berlin, Germany. The company, together with its self-owned subsidiaries and numerous partners, is active across the globe. More than 1,000 companies worldwide use products and solutions from the Beta Systems Group, one of the leading medium-sized and independent software providers in Europe.
