

WITTENSTEIN at SPS/IPC/DRIVES 2008

Mechatronics specialist in Nuremberg from November 25 to 27, 2008 / Press conference and product premiere at our stand in Hall 4/251 at 5.15 p.m. on Wednesday, November 26

WITTENSTEIN AG, a traditional exhibitor at SPS/IPC/DRIVES, will be returning to Nuremberg to participate in this year's fair from November 25 to 27. South-West Germany's specialist for intelligent servo drive technology will once again be represented by several business units of the WITTENSTEIN Group in Hall 4, Stand 251:

- WITTENSTEIN alpha GmbH
- WITTENSTEIN motion control GmbH
- WITTENSTEIN cyber motor GmbH
- WITTENSTEIN electronics GmbH

To celebrate the forthcoming event, the joint stand shared by these four out of the total of seven WITTENSTEIN business units will stage the world premiere of the latest member of WITTENSTEIN motion control's TPM⁺ product family: the TPM⁺ power servo actuator – a motor-gearhead unit that combines a significantly shorter length with very high torque. The new TPM⁺ power hails from the same creative stable as its older brother "TPM⁺ dynamic", which has already successfully mastered more than 25,000 drive tasks. The result is a stunning new design: in addition to a surface that is less sensitive to dirt than ever before, its tremendously powerful build clearly emphasises the product's impressive features.

The new TPM⁺ power makes a perfect complement to the proven TPM⁺ dynamic, which accomplishes its predominantly rotary tasks in robotics and packaging systems with admirable efficiency. It is set to leave a deep mark not only in highly dynamic, linear applications such as rack-and-pinions or ball screws but also as a rotary actuator in automation and machining plants, where it is required to handle heavy masses and high disturbance forces.

31. Oktober 2008

High-tech products made by **WITTENSTEIN** fly into space and win Formula One races. Intelligent drive systems – from the world's smallest high-performance servo drive to the latest state of the art in medical technology – are developed, produced and marketed by a team of around 1.300 employees. With a blend of dedication and enthusiasm, we set benchmarks – every day – worldwide.

Product premiere in Nuremberg:
the TPM⁺ power servo actuator

**Press conference and product premiere at
our stand at 5.15 p.m. on November 26**

Siegfried Wallauer, Product Manager at WITTENSTEIN motion control and as such responsible for mechatronic drive systems, will unveil the new TPM⁺ power to a general audience between 5.15 and 5.45 p.m. on the second day of the show (Wednesday November 26, 2008) at the WITTENSTEIN booth in Hall 4, Stand 251.

WITTENSTEIN AG: Being one with the future

With approximately 1300 employees worldwide and sales of €164 million in 2007/2008, WITTENSTEIN AG enjoys an impeccable reputation for innovation, precision and excellence in the field of mechatronic drive technology – not just in Germany but worldwide. The Group comprises seven pacesetting business units with separate subsidiaries: for servo gearheads, servo drive systems, medical technology, miniature servo units, innovative gearing technology, rotary and linear actuator systems as well as electronic and software components for drive technologies. Through its 60 or so subsidiaries and agents in approximately 40 countries, WITTENSTEIN is additionally represented in all the world's major technology and sales markets.

With its fundamental orientation towards intelligent, mechatronic drive systems and a blend of micro and macro technologies, the company will continue to develop its know-how and core competencies dynamically in all areas.
