dbh Logistics IT AG

Marco Molitor assumes position in dbh executive management

Bremen, July 2011

The Supervisory Board has called upon Marco Molitor, 36, transport and operations management expert (DAV), previously sales director at Cargo Online Software GmbH, to become a member of the dbh Logistics IT AG Board of Management as of August 1, 2011. Former board member, Stefan Engels, will be leaving the company upon mutual agreement in order to pursue new professional challenges.

In his earlier position, Mr. Molitor was responsible for the sales and marketing of software solutions in Germany at active logistics GmbH. As a member of the executive management at dbh Logistics IT AG in Bremen, Mr. Molitor held responsibility for the areas of sales, marketing and business development for nine years. He also gave regular presentations and seminars, proof of his excellent and extensive knowledge of the market in all logistics IT areas.

"The Board of Management, the executive management and the employees are all extremely pleased that Mr. Molitor has returned to dbh to assume this important position," says Reimund Ott.

Reimund Ott, 55, has been a member of the Board of Management at dbh Logistics IT AG since 1995, and will be assuming double leadership of the company together with Marco Molitor.

About dbh Logistics IT AG

dbh Logistics IT AG is a leading software and consulting company for the German and international logistics markets. The company is headquartered in Bremen and employs some 120 employees throughout Germany. Our experts have extensive industry experience and can help you professionally prepare and conduct IT projects for the following topics:

- Customs processing and export control
- Logistics and transport
- SAP$^®$-consulting
- Port solutions

In addition to standard, modular products, we offer individual solutions customized to meet your needs. We provide highly-qualified, custom consulting solutions as well as software development and project management services. You can also choose between having your solution installed at your company or using the SaaS / ASP hosting packet at our high-performance data center. Excellent IT support and our own data center operated in compliance with TIER-III standards (in accordance with the US-American Uptime Institute) guarantee smooth operation 24 hours a day, 365 days a year. Whichever version you choose, our solutions integrate easily into your current IT-infrastructure. With extensive industry experience, our own high-performance data center and selected international partners, we boost your performance.

Quality for your success.
