

## Lantech IGS-0008A

8 10/100/1000T Industrial Unmanaged Switch

Supports 9K bytes jumbo frame

Wide-range redundant power 12~56V input

Provides ESD/ EFT protection

DIN rail and wall mount design with IP30 enclosure

The Lantech IGS-0008A is a 8-Port 10/100/1000T Industrial Switch. To increase reliability, it provides redundant power design where can auto detect power inputs and supports wide input range from 12V to 56VDC.

For better network performance and stability, the IGS-0008A supports jumbo frame transmission up to 9K bytes.

The IGS-0008A is designed to meet the demands of industrial environments, comes packaged in a robust IP-30 housing and has been tested extensively to meet Industrial EMI and EMC standards. Rigorous mechanical testing has also been undertaken with free fall, shock, and vibration stability test, which ensure long term reliability in critical industrial environments.

IGS-0008A is compact in size and easy to be installed with DIN rail and wall mount\*\* kits. IGS-0008A is applicable in many kinds of industrial environments.
